PROJECT EXPERIENCE (BOOTCAMP)

Front End Web Development

bit.ly/kenth-portfolio

Created a responsive static website by utilizing HTML5, CSS3, Bootstrap, and Git for version management, with hosting on GitHub.

Backend Web Development

<https://bit.ly/project-backend-e-commerce>

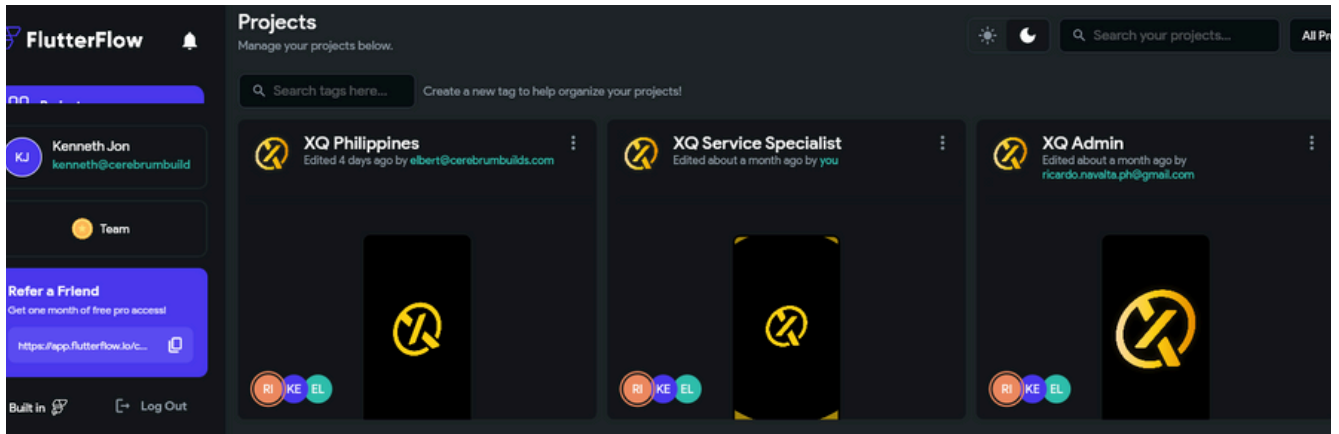

Built a dynamic web application backend with MongoDB, Express.js, and Node.js, utilizing Mongoose for data models and RESTful API routes.

Full Stack Web Development

bit.ly/ShopSHeeSH

Developed a React-based E-commerce web application with API integration and responsive design, utilizing modern JavaScript techniques and DOM manipulation

FLUTTERFLOW PROJECT

XQ Philippines

Application for customers.
Application for customers.

Link below will provide you the screenshots of the UI

Link: [XQ Philippines](#)

XQ Service Specialist

Application for Service Specialist who can provide service for the customers..

Link below will provide you the screenshots of the UI

Link: [XQ Service Specialist](#)

Below some features of the app.

Booking Request

The video will show you on how to place a booking in non premium account and how the service specialist accept the request
